Easebuzz Payment Integration Document
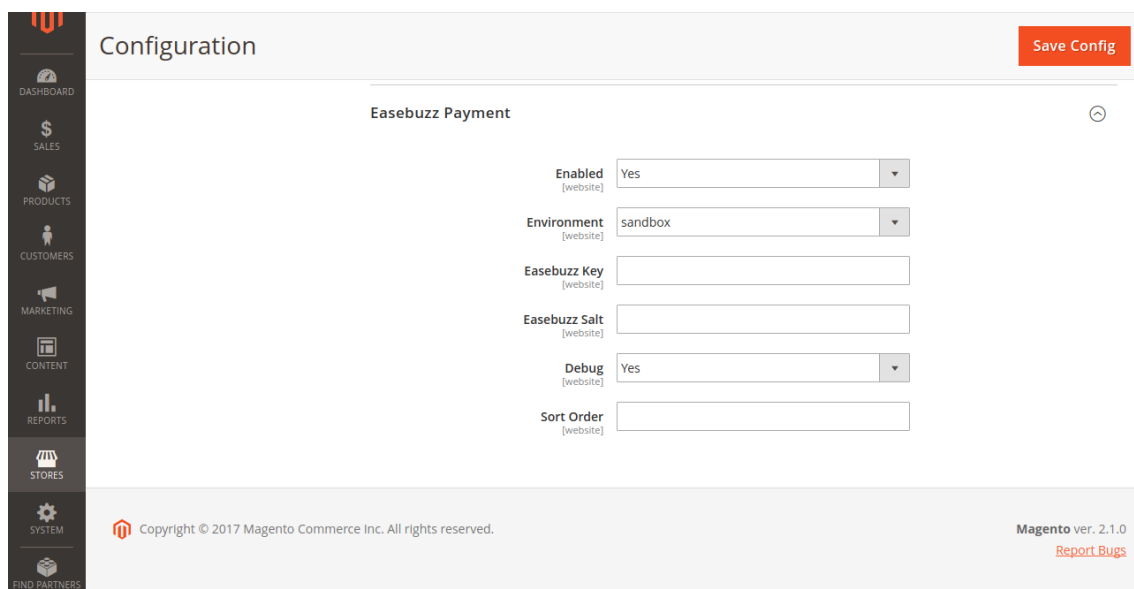

Supports Easebuzz

Introduction

This guide will show you how to Install and configure the Easebuzz plugin for Magento2 on your Magento2 powered website for payments through Credit Card, Debit Card, Net banking and Saved Cards.The plugin supports Payment through Easebuzz payment platform. This plugin is compatible with Magento version 2.x

Install

1) Go to Magento2 root folder extract the Easebuzz zip file.
2) Disable the cache. To Disable the cache Go to Magento Admin Panel **> System > Cache Management > Select all cache type** from left side checkboxes > Select **Action : disable** from right top drop down > click **Submit** .
3) Enter following commands to enable module:
   php bin/magento setup:upgrade
   php bin/magento setup:di:compile
4) Configure the module in Magento2 Admin panel as shown in the configuration section.

Configuring the Plugin

1) Login to magento admin panel and Navigate to **Store -> Configuration- > Sales- > Payment Methods** . Expand the tab named ' **Easebuzz Payment** '.

2) The page shown above should be displayed to you. If not, please clear the cache and then repeat this step.
3) Fill up the following configuration details.
   a) **Enabled:** 'Yes' to enable the module.
   b) **Environment:**

This field determines the gateway environment your payment will be redirected to. This field can have two values:

    i. **Sandbox:** This is a test environment. No actual fund transfer will take place.

    ii. **Production:** This is the live environment. Use this value only for your website in production. Payments sent in production environment will actually get processed.

        # For testing purposes we suggest only use sandbox.

c) **Easebuzz Key:** If you have received Easebuzz credentials then enter this info.

d) **Easebuzz Salt:** If you have received Easebuzz credentials then enter this info.

e) Click on **Save Config**, Now user can make payment via Easebuzz Payment.

Testing

If you want to test the payment first, you should obtain test values for "Merchant Key" and "Salt" (not production) and enable checkbox "Enable Easebuzz Test mode)".

Test key: *XXXXXXXX*
Test Salt: *XXXXXXXX*

Below are the test card details for doing a test transaction in the testing mode. You may use the following card details for testing:

Number: 5123 4567 8901 2346
CVV: 123
Exp. date: 10/18
Name: **any name**
